### Singapore's First Smart E-scooter Storage Launched at Compass One

*Smart, secure, convenient storage for E-scooters and PMDs*

**27 March 2018, Singapore** – E-scooter users can look forward to a secure and convenient storage for their rides with the debut of Easy Zippy's Ez2Keep, Singapore's first smart e-scooter storage service, at Compass One in Seng Kang today.

Located along the pathway of Compass One's entrance near 7-Eleven, the Ez2Keep station is clad in bright green and blue, available 24/7 and easy-to-use. Users can book a storage space via the "Ez2Keep" mobile application (available on iOS and Android) or the station's touch screen kiosk. They can store their e-scooters and retrieve it at any time of their convenience.

Ez2Keep aims to relieve users of the inconvenience of bringing their e-scooter to a shopping mall. This unprecedented new service also eliminates the risk of e-scooters being stolen or damaged, thus conferring peace of mind to the users.

Moving forward, Easy Zippy intends to expand Ez2Keep's services to more shopping malls and commercial buildings. This will allow Easy Zippy to capitalise on Ez2Keep's abilities to track locker usage data and analyse user need patterns to improve their future storage infrastructure.

Andy Wee, CEO of Easy Zippy, gave his thoughts on this game-changing new service: "Ez2Keep's storage infrastructure system can also be expanded to address market demand for last mile services, and we aim to utilise this untapped potential by collaborating with local companies to create new services." Indeed, EasyZippy shows no signs of stopping in its ambition to establish itself as the leader that provides premium services for the growing e-scooter market in Singapore.
